

Interceptor ICP-600

ISO 9001
Certified

Flexible, Compact Multi-Position Switch Control Box

**Part #:
ICP-600**

The Interceptor is made for heavy-duty 12-volt DC use in a wide range of vehicle applications like Ambulances, Police, Fire, Towing, Utility, and Waste Collection. It features a time-tested design that is already in wide use.

Built to Last. The heavy-duty, positive snap-action, lighted rocker switches are protected in a rugged, high-impact, black plastic housing that easily matches most interiors and requires no additional finishing. Switch 1 utilizes an internal 40-amp relay and is protected with a 40-amp circuit breaker. Switches 2 through 6 are protected with 20-amp ATO fuses.

Easy to Install. Each Interceptor is pre-wired with an 18 inch loomed harness. A universal bail bracket, 1/4" fully insulated terminals and mounting hardware are also included with each panel. Legends are easily installed. A standard legend sheet is included, however you can also create custom legends of your own or TST can provide legends to your specifications.

Easy to Maintain. The legends can be easily replaced as often as needed. Fuses are easily accessible from the rear of the unit and are readily available through TST.

Specifications	
Dimensions	6.5" W x 2.5" H x 5" D
Voltage	12 VDC
Max. Loads	60 A Total Device 30 A Switch 1
Wire Type	Hi-temp, GXL cross-link

Features:

- ❖ Commonly features 6-positions
- Other variations available
- ❖ LED-style backlighting for long- life
- ❖ Customizable, replaceable legends
- ❖ Wide range of vehicle applications
